Composite inception and creation date: 07/01/13. ¹2013 returns are partial-year returns, reflecting the composite inception date of 07/01/13. ²The 3-Year annualized ex-post standard deviation is calculated using monthly gross-of-fee returns to measure the average deviations of returns from its mean. ³Dispersion is not calculated for years in which the composite contains five portfolios or less. Dispersion is calculated as the equal weighted standard deviation of gross-of-fee returns for those portfolios held in the composite during the entire period. The benchmark for this composite is the JPM EMBI Global Diversified. You cannot invest directly in an index. Past performance is not indicative of future results.

Fort Washington's Emerging Markets Fixed Income strategy seeks to outperform the JP Morgan Emerging Markets Bond Index Global Diversified (JPM EMBI Global Diversified) on a total return basis. The strategy recognizes emerging markets fixed income as a continually evolving asset class as witnessed by the migration and dispersion of credit quality of the benchmark as well as by consistent addition of countries over the years. Therefore, the strategy first employs a forward looking top-down approach drawing on the four analytical pillars of policy, ectomics, politics, and markets to identify relative value among a truly global opportunity set. Once these opportunities are identified, the fund employs its bottom-up analytical framework to identify the most appropriate securities. All fee-paying, fully discretionary portfolios with at least \$25 million managed in the Emerging Markets style are included in this composite. The fee is 0.55% for the first \$100 million, and 0.50% on additional amounts over \$100 million for separate accounts, and 0.60% for the commingled vehicle. The benchmark for this composite. The fee is 0.55% for the first \$100 million, and 0.50% on additional amounts over \$100 million for separate accounts, and 0.60% for the commingled vehicle. The benchmark for this composite. The fee is 0.55% for the first \$100 million, and 0.50% on additional amounts over \$100 million for separate accounts, and 0.60% for the commingled vehicle. The benchmark for this composite. The fee is 0.55% for the first \$100 million, and 0.50% on additional amounts over \$100 million for separate accounts, and 0.60% for the commingled vehicle. The benchmark for this composite include an interest of the fee performance is not indicative of fee performance was calculated und described do not represent all of the securities purchased, sold, or recommended. Returns are presented gross and net of management fees and include the reinvestment of all income. Gross returns will be reduced by investment advisory fees and other expenses

#### **RISK DISCLOSURES**

The Fort Washington Emerging Markets Debt strategy invests in fixed-income securities of both domestic and foreign issuers which can experience reduced liquidity during certain market events, lose their value as interest rates rise and are subject to credit risk which is the risk of deterioration in the financial condition of an issuer and/or general economic conditions that can cause the issuer to not make timely payments of principal and interest also causing the securities to decline in value and an investor can lose principal. Investing in foreign denominated and/or domiciled securities may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. Investing in the bond market is subject to risks, including market, interest rate, issuer, credit, inflation risk, and liquidity risk.
